Lacrosse is a dangerous sport and activity, involving collisions, contact and potential injury. STOP use of this helmet if it is cracked, deformed or inside padding is deteriorating. Do not butt, ram, spear, or strike an opponent with any part of this helmet or faceguard. Doing so may cause you to suffer severe brain or neck injury, including paralysis or death and possible injury to your opponent. Contact in Lacrosse may result in Concussion/Brain Injury which no helmet can prevent. Symptoms include: loss of consciousness or memory, dizziness, headache, nausea or confusion. If you have symptoms, immediately stop and report them to your coach, trainer, and parents. Do not return to a game or contact until all symptoms are gone and you receive medical clearance. Ignoring this warning may lead to another and more serious or fatal brain injury.

Ignoring this warning may lead to another and more serious or fatal brain injury.
Powerful, Bold New Helmet Design

The new shell and face mask design incorporates crafted lines that accentuate speed, giving you an aggressive, fast look and improved field of vision. Massive amounts of air flow from the ventilation built right into the shell. Made from polycarbonate for long-lasting strength and durability.

TPU: The game’s best impact absorption system featuring TPU Cushioning: game-changing technology that’s been migrated over from our game-changing football helmets. TPU Cushioning has been proven to absorb more impact across a wider variety of temperatures than other football helmet. It’s incorporated into the key target-areas throughout the Rival.

Built-in Air Pump with SUREFIT Inflatable Air Liner

The All-New SUREFIT system features integrated pump and release buttons, allowing players to adjust their fit on the fly. No detachable pump needed, just inflate or deflate to your desired fit, right on the field.

Molded EVA Front/Back Pads

Provide extra protection and impact absorption in key areas, while making the Rival incredibly comfortable and easy to wear.

Interchangeable EVA Jaw Pads in Multiple Sizes

are a key component in creating a truly custom fit for every player wearing the Rival.

1. The game's first fitted helmet, available in Small thru XL. Made from Polycarbonate which is stronger, more durable and resilient than ABS. Designed to withstand the rigors and impacts of the game's highest levels.

2. A Powerful Combination of Impact Absorption Technology featuring AIR Maxx TPU Cushioning and patented D30® technology. The crown area features Single Layer TPU Cushioning, along with a TPU encased Comfort Liner. The sides of the 650 are built with Single Layer TPU Cushioning covered by an EVA Comfort Liner.

3. Patented D3O® Technology is featured in the back of the helmet, also covered with an EVA Comfort Liner. The all-new front pad, re-designed with a high impact absorbing polymer, comes with a removable (and washable) comfort liner.

4. COMPLETE CUSTOM FIT WITH SUREFIT AIR LINER - the Stallion 650 features a high-performance inflatable SUREFIT air liner that wraps comfortably around your head. The front pad is curved to more naturally fit your head, enabling you to wear the helmet at the proper tilt.

5. Interchangeable EVA Jaw Pads in Multiple Sizes are a key component in configuring a truly custom fit for every player wearing the Stallion 650.

AMERICA'S BEST TEAMS WEAR
AMERICA'S BEST HELMETS

The game’s first fitted helmet, available in X-Small, Small and Med/Large. Made from a strong and durable polycarbonate material that incorporates impact modifiers within the shell for additional strength.

High-Performing Impact Absorption System featuring an EVA comfort liner which adds an additional layer of impact absorption. It rests over the top of the EPP Liner system which gives you consistent impact absorption and coverage throughout the helmet.

Elastic Adjustability System uses built-in elastic straps (located in the back of the helmet) to give you a consistent and proper fit over a wide range of head sizes.

Interchangeable EVA Jaw Pads in Multiple Sizes are a key component in creating a truly custom fit for every player wearing the Stallion 650.

WHY CHOOSE SCHU TT RECONDITIONING FOR YOUR LACROSSE HELMETS?

Football teams recondition their helmets nearly every season. It’s the best way for them to get the best value out of their equipment. It prolongs the life of the helmet and ensures the helmet is inspected and re-certified to the same standards as a new helmet. You should adopt the same reconditioning protocols as football teams.

THE BACKGROUND

NOCSAE: Lacrosse helmet standards are developed by the National Operating Committee for Standards of Athletic Equipment (NOCSAE). All helmets used on a lacrosse field (new or reconditioned) must meet NOCSAE standards.

NAERA: The National Athletic Equipment Reconditioning Association is sports’ governing body, ensuring all companies that recondition equipment are in compliance.

10 Year Policy: Per NAERA guidelines, lacrosse helmets ten years old or older cannot be reconditioned.

THE PROCESS

We are a member in good-standing with NAERA and recondition and re-certify lacrosse helmets to NOCSAE standards. Here’s what happens when WE recon your helmets:

- Parts are removed, inspected, cleaned and sanitized.
- Helmets shells are inspected, cleaned and sanitized.
- Helmets are buffed/polished or painted as needed. (most lacrosse helmets cannot be painted).
- Snaps and cage hardware are replaced as necessary.
- Internal parts and cages are replaced as necessary.
- Helmets are drop tested randomly.
- Decals/stripes are installed if requested.
- Helmets are labeled with a NOCSAE recertification sticker.
- Rejected helmets, if requested, will be returned to the school or team. Helmets that are 10 years old or older will not be returned, per NAERA guidelines.
